

The Cat of Points welcomed two visitors to Multabland. "I'm Doctor Bulb, and I'm  $2/5$ ," said one. "I am ze Monsieur Block, and I am  $3/4$ ."

"I wonder, gentlemen," responded the Cat of Points. "how many of Monsieur Block would go into one of Doctor Bulb--speaking lengthwise, naturally."

Doctor Bulb and Monsieur Block pondered the problem. Then the Spirit of 1 used cheesecake to lure them into room called  $\times 4$ .

As soon as they entered, each one grew exactly four times bigger!

"Now I'm  $8/5$ ," exclaimed Bulb. "And I am ze 3," announced Block.

Next Spirit of 1 took the cheesecake into the room  $\div 3$  in the Division Dungeon. Doctor Bulb and Monsieur Block followed, and immediately shrank to three times smaller.

Doctor Bulb remarked, "Hmmm, I am reduced to  $8/15$ ." "Look!" shouted Monsieur Block, "I am ze 1." "Precisely," replied Spirit of 1. "Now you can have some cheesecake."
